# LAUFEN – THE COMPANY

LAUFEN stands for swissness, quality and design, offering complete bathroom solutions around the world.

## Making the bathroom a living environment

The personality of this highly traditional Swiss brand reflects a symbiosis of design, quality and functionality. LAUFEN is one of the world's leading manufacturers with a global distribution network. The company's core competence is its knowledge in the area of sanitary ware manufacturing. For over 125 years, the LAUFEN brand has been using the oldest malleable material known to man to make innovative sanitary products in state-of-the-art plants with legendary Swiss precision. Knowledge of the bathroom as a whole is developed from the competence of LAUFEN in ceramics manufacturing, and sophisticated design.

**BATHROOM CULTURE FOR 125 YEARS**

What makes LAUFEN products unique at first glance is that their Swiss design unites two major design trends: emotional Italian design from the south and the

northern tradition of design precision and clarity. For LAUFEN, quality has two aspects: manufacturing knowledge and high degree of practical benefit that the finished bathroom affords the customer – which is often not immediately apparent. LAUFEN, a Swiss company manufacturing products that allow water, a precious resource, to be used sparingly, demonstrates in this manner a commitment to preserving natural resources and environmentally-friendly production.

**THE CANTON OF BASELSTADT BETWEEN THE RIVERS DOUBS AND RHINE**

## From humble beginnings to today's global player

When LAUFEN was founded in Switzerland in 1892, sanitation was still a far cry from the standards and comforts offered today; standards, which were particularly influenced by LAUFEN, the only sanitary ceramics producer that manufactures exclusively in Europe.

**FIRST MECHANICAL FACTORY FOR SANITARY WARE ON THE EUROPEAN CONTINENT, ZNOJMO**

Some of the production facilities that belong to the company today can be traced back even further into history.

In 1878 for example, the pioneer in the mechanical manufacture of sanitary ceramics was a production site belonging to the Austrian monarchy. It is not just tradition, but also the strong anchor which various European manufacturing sites maintain in their domestic markets, Switzerland, Austria and Czech Republic, that underpin the quality of LAUFEN as a company. LAUFEN's goal then was the same as today's: to lead on technology, service and design.

Back in the 1980s, LAUFEN engineers invented the most efficient high-pressure casting technology for ceramic production and therefore ensured a sustainable breakthrough in industrial production.

**DEVELOPMENT OF THE WALL HUNG TOILET BY LAUFEN ENGINEER XAVER JERMANN, 1964**

Just as important at LAUFEN are the constant developments in design: wall-mounted WCs and floor-standing washbasins have enabled a new sense of aesthetics. In 2013 LAUFEN's worldwide material innovation SaphirKeramik succeeded in revolutionising the design language of ceramic.

The innovative and valuable SaphirKeramik formulation gives the starting material unprecedented possibilities and scopes. SaphirKeramik is used when a design includes thin walled shapes and tight radii.

**THIRD GENERATION SAPHIRKERAMIK WITH A DESIGN BY PATRICIA URQUIOLA**

## A building of great symbolic value

**THE LAUFEN FORUM IS A 6,500 CUBIC METER ARCHITECTURAL STATEMENT, A VISITOR AND PRESENTATION CENTRE DESIGNED BY BASEL BASED ARCHITECTS NISSEN & WENTZLAFF, PHOTOGRAPHED BY MAURIZIO MERCATO.**

LAUFEN is synonymous with perfection in terms of form and craftsmanship and for advanced technology with an unobtrusive face. LAUFEN's headquarters in the conton of Basel-land reflect this identity.

Ludovica + Roberto Palomba designed "bowl / 08", a washbasin for the Palomba Collection. Architects Nissen & Wentzlaff then created a larger version of this object in the form of the building which stands out with its impressive exposed concrete and elegant statics.

An inventive spirit and desire for technical innovation are also part of the building's concept and require efficient resource usage and an acceptable ecological footprint. As a result, the multi-award-winning building is an outstanding feature in the Basel area, an area which is rich in superb architecture.

With the Forum, LAUFEN has created a new architectural setting for its products: it is a comprehensive architectural statement in concrete with the bathroom at its centre and acknowledges Switzerland unequivocally as the company's headquarters and production site.

A space for the bathroom with the power to inspire clients, architects, retailers and tradesmen alike as well as providing a source of information. This is also the home of the training centre of LAUFEN Bathrooms AG.

A wide range of seminars is held here to train groups and communicate product knowledge.

LAUFEN won the "Award for Mar-

keting + Architecture" in the category "Office and commercial buildings - industrial and commercial interiors" in 2010. It also won the "Green Good Design" award and, in 2011, the "best architects award 2011" in the category "Business and Industrial Buildings".

## A new kind of creative space

**TRAINING CENTRE AND CREATIVE SPACE MADRID - DESIGN BY PATRICIA URQUIOLA**

In 2016, LAUFEN opened a creative space for bathrooms in Madrid.

The interior concept was designed by Patricia Urquiola, one of the most renowned, award-winning, and versatile designers of our time.

The context of the new creative space, with an area of almost 200 square meters, is a historical villa from the early 1900s. Organised on two levels, this attractive space is reserved exclusively for architects and designers. Patricia Urquiola conveys the spirit of the Swiss company brilliantly and applies a sensitive approach.

## Individual solutions

The individual planning and design of bathrooms is a growing segment of the sanitary market. Architects and planners of high-quality private residences in particular, but also public and semi-public buildings, such as hotels, often require individual solutions that can be fitted precisely into the floor plans of sanitary rooms and bathrooms, in order to meet the special requirements of the client.

LAUFEN is adapting to these requirements with numerous solutions from its range of products and creating bathrooms made to measure:

These include, for example, washbasins, ceramic shelves, mirrors and bathroom furniture manufactured to the millimetre, but also colour or custo-

misation options. Even faucets can be individualised, and special handles, logos, colours, and surfaces can be provided as required.

**TAILOR-MADE SOLUTIONS CAN BE REALISED TO MEET CUSTOMER REQUIREMENTS**

In the meantime, modern solid surface materials are also available that can be used to realise individual customer requirements in the shortest possible time in small quantities. When it comes to washbasins, worktops, accessories, furniture, shower trays, bathtubs, sinks, and even wall coverings, there are almost no limits to creative drive.

This enables architects and designers to create their own designs that harmonise perfectly with the room and decor. LAUFEN also offers a complete service package, which includes feasibility checks, assistance with technical drawings, the manufacture of models and prototypes, the adaptation of accessories, direct shipping, and after-sales service.

**VARIETY OF SHAPES THANKS TO MINERAL MATERIALS**

# LAUFEN – THE PRODUCTION

## LAUFEN IN FIGURES

LAUFEN BATHROOMS AG IS A SWISS COMPANY SPECIALISING IN PREMIUM SEGMENT SOLUTIONS FOR BATHROOMS. THE HEADQUARTERS ARE LOCATED IN LAUFEN NEAR BASEL. MANAGED BY THE FAMILY-OWNED ROCA GROUP SINCE 1999 LAUFEN RUNS 7 MANUFACTURING SITES IN CENTRAL EUROPE, WITH 2500 EMPLOYEES AND SALES OFFICES IN 44 COUNTRIES.

### Global network with local service

PRODUCTION SITES IN CENTRAL EUROPE

**1** The company is named after the town of LAUFEN near Basel in Switzerland where it has produced washbasins, bidets and toilets in sanitary ceramic for 125 years. The management of LAUFEN Bathrooms AG, faucet production, training centre and the LAUFEN Forum are also located here.

**2** The production facility in Gmunden specialises in the manufacture of highly sophisticated bathroom sanitary ware. The Gmunden facility has acquired this

expertise through a long tradition in ceramics production.

**3** English earthenware was already produced in 1795 in Wilhelmsburg, Austria. Today, this factory practises the fine art of sanitary ware production.

**4** The state-of-the-art factory in Znojmo, in the Czech Republic, produces high quality bathroom ceramics. This factory has a long tradition which goes back more than 135 years.

**5** Bechyně is not only the home of the oldest vocational school of ceramics in the Czech Republic, it is also a modern factory where high quality ceramics have been produced for more than 50 years.

**6** LAUFEN ceramics products are produced in accordance with strict LAUFEN quality standards (LQS) at the state-of-the-art Roca Group factory in Gliwice.

**7** In addition, LAUFEN bathtubs are made of acrylic and mineral cast materials in Gryfice, Poland.

### Sustainable quality

#### Economic water flush systems

LAUFEN's 4.5/3-litre toilets meet all functional requirements defined by international standards EN 997 Class 1 Type 5, EN 997 Class 2 and SAI/Wels 4 Stars.

Please take into consideration your local requirements that may vary from country to country.

Find further information in the chapter Product features and benefits.

#### European water label

The database of the European Water Label provides architects, planners and consumers with a comparative tool that is

- LAUFEN branch
- Worldwide export

valid in the whole of Europe and that allows them to evaluate the water consumption of a water-using product in the bathroom or kitchen at a glance.

Find further information in the chapter Product features and benefits.

### Environmental protection standards

Environmentally friendly production of modern, durable and resource-saving products.

Since 1998, LAUFEN has continually monitored the use of resources in all its internal and external processes. Targeted measures and appropriate investments promote the efficient and sustainable use of manufacturing resources. Important key environmental protection indicators now clearly show that LAUFEN production sites fulfill the legally-prescribed environmental protection standards, and in most cases also exceed them.

### Certification

The first two LAUFEN production facilities were successfully ISO 14001 certified and EMAS registered in 1997.

Both of these factories were awarded the European Environment Prize 2007 for exemplary environmental management. All the LAUFEN production facilities are now certified with the Environmental and Quality Management Systems ISO 9001 and ISO 14001.

### Swiss Quality

Products with the Q-Plus certification meet both the European standard and the established more stringent Swiss su-issetec/VSA standard.

LAUFEN sanitary ware products meet these Swiss quality standards and have been recommended for approval accordingly.

# LAUFEN – THE INNOVATIONS

 SaphirKeramik

## Freedom to Reshape

SAPHIRKERAMIK VERSUS FINE FIRECLAY

SaphirKeramik available on the market is the latest, globally significant innovation from LAUFEN.

This revolutionary, ceramic material reaches its exceptional hardness blended with corundum, a colourless mineral, which is a component of sapphires. This gives SaphirKeramik a flexural strength equal to that of steel. Yet it has the potential to be wafer-thin, giving designers almost infinite freedom to experiment – and tear up the rulebook of bathroom design.

After some years of experience of producing SaphirKeramik pieces on an industrial scale, LAUFEN is now stretching the patented material's limits by exploiting its super-fine forms not only to create exquisitely detailed textures and patterns but also by engineering the innovative material to increase its maximum size – a 120 cm-long washbasin in SaphirKeramik is the largest to date. LAUFEN has also applied its impressively efficient, high-pressure casting technology to, high-volume pieces in SaphirKeramik.

   
Design Preis Schweiz  
Prix Design Suisse  
Design Prize Switzerland

**design  
preis  
SCHWEIZ**

THE THIN-WALLED SAPHIRKERAMIK WAS TESTED FOR IMPACT RESISTANCE AT THE KERAMIK INSTITUT MEISSEN

Simultaneously hard and malleable, SaphirKeramik enables pieces to be made with very thin, yet very strong walls of only 3 – 5 mm, as well as with narrowly defined radii of only 1 – 2 mm. The slim profile of SaphirKeramik means that it saves space, is light and environmentally friendly. The new design characteristics of this innovative material are rooted in its exceptional hardness and strength.

SAPHIRKERAMIK HAS A TWO TO THREE TIMES HIGHER BENDING RESISTANCE THAN TRADITIONAL CERAMICS

When the mechanical properties of the two traditional sanitary ceramic masses – namely vitreous china and fine fire clay – are compared, the performance of SaphirKeramik is unique even in international comparison.

The comparative values measured by the Federal Institute for Materials Research and Testing in Berlin (BAM) for SaphirKeramik are, at an average of over 120 MPa;

Production of SaphirKeramik with the casting technology invented by LAUFEN

comparable with carbon steel and twice as high as for vitreous china. LAUFEN was awarded the Swiss Design Prize 2017/18 for the development of SaphirKeramik.

„Aspects such as ecology and sustainability may not have been the focus of attention in the development of SaphirKeramik, but they contribute significantly to the positive overall image of the material,” the jury commented. In doing so, it acknowledged the additional advantages of the material: Lower material costs, for example, which are also due to a simplified structure of the ceramic parts, as well as the advantages in terms of environmental protection and sustainability, since fewer raw materials and less energy are used in the firing, production, and transport of SaphirKeramik.

PRODUCTION OF SAPHIRKERAMIK WITH THE CASTING TECHNOLOGY INVENTED BY LAUFEN

«New materials have always been one of the most important driving forces behind the development of design. With SaphirKeramik, the traditional Swiss brand LAUFEN has succeeded in creating an equally surprising and remarkable innovation whose effects on sanitary ceramics can only be estimated to a limited extent today.»

## BENDING STRENGTH

Source: Bundesanstalt für Materialforschung- und Prüfung, Berlin, 2011

## IMPACT ENERGY

«The composite material, which does not require chemical additives, wows with its specific properties - hardness, bending strength - and offers the enormous economic advantage of being suitable for processing using traditional production processes.» These were the words the jury used to elaborate on their decision to award SaphirKeramik the Swiss Design Prize.

**SAVE!**  
smart  
sanitation  
for a sustainable  
future

INTEGRATED INNOVATION

Human urine is a rich source of phosphorus and nitrogen. These nutrients are valuable raw materials in the production of fertilisers used in agriculture. However, at present, the nutrients in

urine often reach the natural waters directly, going through the wastewater treatment plants largely untreated.

When introduced into the water system, nutrients such as nitrogen and phosphorus do exactly what they do on land: they promote plant growth, contributing to algae bloom and, subsequently, to the formation of the so-called „dead zones“. This has an impact on biodiversity and the health of marine systems, as well as on the economy, particularly fisheries and tourism.

In times of increasingly scarce resources and dwindling raw materials, it is well worth considering urine as a resource rather than letting it go wasted in the sewage system.

### SOURCE SEPARATION TECHNOLOGY

If the waste streams are separated as soon as they are produced, they can be processed more sustainably in order to recover valuable resources, and wastewater management becomes part of the circular economy.

In addition to that, the effort required at the wastewater treatment plants is reduced immensely, as 1.5 litres of human urine currently contaminate approx. 180 litres of wastewater.

URINE TRAP

### INVISIBLE INNOVATION

Together with Austrian design studio EOOS and the Swiss research institute Eawag, LAUFEN developed a ground-breaking urine separation toilet that opens a new chapter in sustainable wastewater management: "save!".

The key innovation in "save!" is the urine trap, created by EOOS Design. It uses the hydrodynamic principle of the tea-pot effect to conduct the urine towards a concealed outlet using only surface tension.

The intelligent design of the ceramic body ensures that the urine separation occurs irrespective of whether the toilet is used by a man, a woman or a child.

Rimless and wall-mounted, "save!" meets all industry standards and therefore compromises neither on comfort, nor on hygiene.

A NEW PARADIGM

### THE VISION

The installation of urine separation toilets into hotels, public areas and residential developments will lead to sustainable and energy-saving wastewater management, seamlessly integrated the circular economy by efficiently treating the collected wastewater, recovering and recycling the preserved nutrients.

TRANSFORMATIVE CHANGE

"FINALLY A SANITATION SOLUTION THAT IS FIT FOR THE 21ST CENTURY".

TOVE LARSEN, PROFESSOR FROM EAWAG'S DEPARTMENT FOR URBAN WATER MANAGEMENT

# LAUFEN – THE HISTORY

**1892**

It was on 4th July 1892 when the success story of the „Tonwarenfabrik LAUFEN“ started with the production of bricks and clinkers. The company was founded by three men: Albert Borer, Johann Spillmann & Joseph Gerster-Roth.

**1898**

Demand for earthenware increases to a volume that makes the construction of a second factory in LAUFEN necessary. The factory, which started production in 1898 was mainly used for the production of roof tiles and bricks as well as drainage pipes.

**1905**

A canteen is installed on the premises, where quality meals are offered for the workers at 40 cents.

**1924**

The acquisition of the Aktienziegelei Allschwil, the chimney production Allschwil and the brick factory Tranzer had a „positive impact on all brickyards in the LAUFEN valley“.

As a result, a third kiln is inaugurated. In the same year, the share capital of the „Tonwarenfabrik LAUFEN“ is increased to 1 Mio Swiss Francs.

**1925**

Under the directive of Guido Gerster, CEO and member of the supervisory board of the Tonwarenfabrik LAUFEN, the „Aktiengesellschaft für keramische Industrie LAUFEN“ is established on 26th November. Fire clay is introduced, which enables the company to produce washbasins and sinks.

**1931–1933**

An innovative porcelain-like material is launched under the brand name KILVIT. KILVIT is much stronger than fire clay and the pieces come out completely white and dense.

**1934**

A factory is built to produce wall tiles from stone ware. Thus turning the „AG für keramische Industrie“ into the first manufacturer of wall tiles in Switzerland and serving the national construction industry during the war years

**1938**

The production of wall tiles is followed by that of floor tiles. Another factory is built in LAUFEN to produce these floor tiles from stone ware. In a difficult business environment new jobs are created.

**1949**

After World War II, the Swiss Federal Railways, SBB, turns its attention to the electrification of the vast national railroad network. LAUFEN responds with the production of electro-technical porcelain – mainly insulators – and becomes a strong supplier of SBB.

**1952**

Within a short period of time, a new factory is constructed in Campo Largo, in the greater Curitiba region, by „AG für

keramische Industrie LAUFEN“ to also manufacture wall and floor tiles in Brazil. The company is registered under the name of INCEPA S.A.

## 1967

LAUFEN acquires the Vienna-based OESPAG (Österreichische Sanitär-Keramik und Porzellanindustrie AG) with its two Austrian production sites in Gmunden and Wilhelmsburg.

## 1970

The „Keramik Holding AG LAUFEN“ is founded in response to the organisational structure needed to successfully guide the 4'000 employees at various locations in Switzerland, Austria, Germany, Spain and Brazil.

## 1971

The progressive development of the company necessitates new headquarters. The appointed architect is Giuseppe Gerster, a grandson of Joseph Gerster, who once founded the company.

## 1973

„On Saturday 3rd August shortly before 3:00 p.m. a fire had broken out in the floor tile factory belonging to the Tonwarenfabrik LAUFEN AG.

It emanated from the oil burner at kiln I. Despite the quick reaction with fire extinguishers, the fire was able to spread out, thus destroying the plant to a great extent.“ [Extract from the media]

## 1982

Ceramic pressure casting, developed by Keramik LAUFEN over years, is unveiled to the public for the first time in October 1982. A process which sets new standards for the sanitary industry, it enabled LAUFEN first to significantly boost its capacities, its efficiency as well as its range.

## 1986

Issue of 140 000 share certificates at 650 SFr each.

## 1990

LAUFEN focuses increasingly on design. Porsche Design is the first internationally renowned name to be consulted.

## 1997

From 1992 to 1997, the company went into debt through acquisitions and embarked on the restructuring of the group which had been due for years.

## 1999

LAUFEN becomes part of the ROCA group, and thus belongs to one of the largest and most influential enterprises in the bathroom and sanitary ware industry.

## 2002

In 2002 LAUFEN launched 'Tam Tam', the world's first standing washbasin, cast in one piece.

The washbasin belongs to the design line ILBAGNOALESSI One by Stefano Giovannoni.

## 2009

The LAUFEN Forum opens its doors. In addition, the Similor headquarters and production facilities are relocated to LAUFEN. This was the last step in the creation of the Swiss competence centre for bathroom culture in LAUFEN.

## 2013

With the innovation of „SaphirKeramik“ LAUFEN presents a groundbreaking world novelty and sets a new standard for bathroom design.

Keramik LAUFEN celebrates its 125th anniversary.

# LAUFEN – THE DESIGNERS

## Andreas Dimitriadis

Andreas Dimitriadis launched platinum-design in 2007. In the heart of Stuttgart, his team of product designers, CAD specialists, and model makers works for international brand manufacturers. platinumdesign stands for premium quality as well as commercially successful and multi-award-winning design.

## THE NEW CLASSIC

### WASHBASINS WITH FURNITURE / WC / BIDET / BATHTUB / ACCESSORIES

A collection of perfectly shaped innovations for the bathroom. The New Classic radiates the practicality of the harmonious form and combines it with contemporary style. A clear formal expression of modern elegance comes into being which celebrates the bathroom as a place of cleanliness and purity. The award-winning technological quantum leap of SaphirKeramik turns every piece into a witness of progress.

# SONAR Design by Patricia Urquiola

SONAR washbasin 60 with vanity unit; wall-hung WC; freestanding bathtub with tap bank and surface structure; backrest, tray for Sonar bathtubs  
KARTELL BY LAUFEN faucets

# SONAR SAPHIRKERAMIK

Patricia Urquiola exploits the fineness of LAUFEN's SaphirKeramik. The designer uses the probably biggest material evolution since the invention of the ceramic material for spectacular elegance in the SONAR series. Accentuated geometry and sensual textures draw a dimension that stimulates even the water to new momentum.

# IL BAGNO **ALESSI** One Design by Stefano Giovannoni

IL BAGNO ALESSI ONE vanity washbasin 90; wall-hung WC 'rimless'; wall-hung bidet; freestanding bathtub; vanity unit 120; mirror; toilet roll holder

# ILBAGNOALESSI ONE

Italian architect and designer Stefano Giovannoni breaks out. From the repetition of form of room geometry, which only ever produces the same templates. He leaves worn stereotypes behind and combines the extraordinary with the popular. Well-known structural frameworks suddenly evoke irregular, subtle associations that dissolve the principles of perception and open up new spatial worlds. However, the newly conceived contours of the Italian architect and designer are not only reflected in the first complete bathroom scenario for ILBAGNOALESSI ONE. They are also knighted by the exhibition in the permanent collections of the Centre Georges Pompidou in Paris and the Museum of Modern Art in New York.

KARTELL BY LAUFEN column washbasin mixer; column bath mixer

# PALOMBA COLLECTION

Water, as a source of life, represents the source of inspiration for Ludovica and Roberto Palomba. This was noticeable with all senses when the successful PALOMBA COLLECTION from LAUFEN was launched. The intensive connection with the fluid and sparkling element finds its definition in the formal language, which the famous Italian designer duo describes with the expression „fingerprint of nature“. The tension between strict geometry and organic form characterises the entire collection and ensures that all pieces come closer together. In the extension of the PALOMBA COLLECTION, soft, organic lines present themselves as harmonious elements that also enable the most demanding bathroom designs.

# KARTELL BY LAUFEN

Ludovica and Roberto Palomba continue to play off the strengths of the Kartell by Laufen range of icons with the greatest of ease, lending physical form to the endless options available by combining colours, forms and surfaces. New washbasin creations of this design classic in an extremely compact form and created from revolutionary SaphirKeramik. For your own freedom in bathroom design. For decisions with sense and feeling. For an unparalleled amount of space. For tangible quality that leaves nothing to be desired.

Andreas Dimitriadis

LIVING SAPHIRKERAMIK bowl washbasin round KARTELL BY LAUFEN column washbasin mixer

# LIVING SAPHIRKERAMIK

LAUFEN opens up new perspectives. It breaks up the traditional scope for bathroom design and, since the invention of SaphirKeramik, allows us to look deep into a new era of form design. LIVING SAPHIRKERAMIK makes full use of the accurate characteristics of this revolutionary material and sets new standards with strict lines and tightly defined edge radii, which find their perfection in finely coordinated furniture combinations.

# INO Design by Toan Nguyen

INO vanity washbasin, shelf right; vanity unit; freestanding bathtub  
KARTELL BY LAUFEN wall-mounted basin mixer with tray; column bath mixer; 'Max-Beam' stool FRAME 25 mirror

# INO

Toan Nguyen does not allow himself to be locked up. He loves expansiveness. Both mental and physical. This is also reflected in the new bathroom collection, which the French designer has designed for LAUFEN. Immaculate objects with simple lines and delicate yet extremely stable walls conjure up an elegant, inviting and almost weightless look. A new interpretation of classic forms which not only touches the hearts of hard-line purists.

# VAL Design by Konstantin Grcic

VAL wall-hung WC 'rimless'; drop-in washbasin 55; freestanding bathtub Ø 130; wall-hung bidet; basin mixers; bidet mixer  
LIS flush plate BOUTIQUE countertop to measure, 120mm thick FRAME 25 mirror

# VAL

A material that offers new possibilities, a Designer, who pursues new ways, a connection that creates new worlds. For a bathing experience that awakens unknown emotions. With his evolutionary designs, Konstantin Grcic architecturally stages the revolutionary SaphirKeramik from LAUFEN, thereby completing the bathroom collection VAL.

Clear geometric lines, extremely narrow edges and finely textured surfaces united in harmony, open up a unique category of bathroom culture.

# PALACE Design by Andreas Dimitriadis

PALACE combipack 80, washbasin ,slim' with vanity unit; wall-hung WC ,compact' LIS flush plate FRAME 25 mirror

## NEW WASHBASINS WITH FURNITURE

The beauty of good design only unfolds in combination. The new designs of Andreas Dimitriadis coordinate the perfectly shaped ceramic elements of PALACE with highly functional furniture. The coherent holistic nature of the collection is re-interpreted in every piece. The power of the arrangement amplifies its effect through the fusion of the two elements.

# LAUFEN PRO S Design by Peter Wirz

PRO S combipack washbasin 'slim' with vanity unit PRO, 80; tall cabinet PRO wall-hung WC, 'rimless' LAUFEN SOLUTIONS MARBOND shower tray  
LIS flush plate CASE tall cabinet FRAME 25 mirror cabinet CITYPRO thermostat shower station, basin mixer

# LAUFEN PRO S

With lots of sensitivity Peter Wirz brought about a systematic, production-optimised evolution of the PRO concept: Thanks to its slim silhouette and clearly-defined radii, the washbasin has a light and elegant, appearance. The deep bowl means that it's also functionally appealing. The aesthetics of LAUFEN PRO S therefore definitely take the range in the direction of LAUFEN's premium design lines – while remaining affordable by all.

## CLEANET SHOWER TOILETS

Shower toilets have been number one in matters of hygiene for a long time and are now standard in more and more bathrooms. The comfort of intimate washing with pure water has proven itself through constant technological progress. Their aesthetic qualities have become aligned with the formal expression of modern bathroom design and therefore embody the highest demands in terms of design: form and functionality for a better quality of life in the bathroom.

### PERFECTLY COMFORTABLE

The Cleanet shower toilets blend seamlessly into any bathroom interior with their timeless ceramic body. This means increased design quality, thanks to the familiar aesthetics, as well as improved quality of living, thanks to intimate washing with pure water.

### EASY TO USE

The great feeling of freshness and cleanliness, always within reach: the rotary button on the Cleanet shower toilet enables easy and intuitive use of the many shower functions. Turn and press – hygiene can be that easy. Additional functions and settings can be accessed via remote control or app.

### THOROUGHLY CLEAN

The Cleanet shower toilets offer all-round optimum hygiene and cleanliness. The multi-level hygiene concept ranges from the basic shower functions, to self-cleaning after every use, all the way through to simple maintenance cleaning and automatic descaling.

# CLEANET RIVA

Pure theory takes shape - in the form of a flawlessly designed unit featuring a technically advanced interior. The visionary concept is apparent in the strikingly sensitive design of this incomparable shower toilet, which boasts an intuitive stainless steel control system. Thanks to its patented technology, this design takes the holistic approach - incorporating design, comfort and hygiene - to an entirely new level, and has been rewarded with the most prestigious design awards.

## DESIRE - THE MEASURE OF ALL THINGS

No furniture series could enhance a bathroom more surprisingly. In the BOUTIQUE range, the highest quality materials and wood finishes have been strategically selected with great care and technical finesse to ensure they meet the needs of the most discerning customer. Here, the characteristics of the trend-setting SaphirKeramik are reflected in the fine design language. Narrow, tapered edges provide perfectly shaped storage space in the bathroom which harmonises immaculately with the fine washbasin shapes. The crowning glory is the user-friendliness of the sophisticated design with seemingly incidental, intelligent technical solutions.

## FURNITURE AND COUNTERTOPS

We choose furniture to set up our homes, express our style and make visual statements. However, it is not just the looks that decide whether a piece of furniture is attractive, but also its feel and functionality. Thoughtfully designed, the CASE range of bathroom furniture, with its minimalistically simple appearance, successfully combines these factors. The style of architectural modernity, scaled back and timeless, leaves all the ceramics centre stage.

# LEELO Mirror range

LEELO mirror 120 with LED light and touch sensor VAL Double washbasin 120 with semi-wet area; single lever basin mixer; towel holder

## NEW MIRROR RANGE

The choice of mirror is a detail which is fundamental for the ambiance of the room. With LEELO, we have created a flexible solution which carries the essence of all our product lines and allows itself to be combined with the complete portfolio. Clear design and technical sensitivity create the variants of LEELO. These mirrors always put the focus on the user and can be applied to countless bathroom situations, thereby embodying the dynamic culture of Laufen.

# SENTEC BATHTUBS

ILBAGNOALESSI ONE freestanding bathtub KARTELL BY LAUFEN column bath mixer

## SENTEC BATHTUBS

The force of nature is unexpectedly conjured up in a solid surface bathtub. With the high proportion of mineral particles, the surface feels as smooth as stone which has been rounded and polished over time by gently flowing water.

The pleasant, warm touch of the surface conveys a feeling of health and cleanliness - providing pure relaxation.

## STEEL BATHTUBS AND SHOWER TRAYS

There are not many things that will last a lifetime. With bathtubs and shower trays made of heavy-duty, enamelled steel, LAUFEN however creates a pleasant feeling of eternity. The products present themselves in their most beautiful designs as being dimensionally stable, scratch, impact, and abrasion-resistant.

# BATHTUBS WITH LIGHTING / WHIRL SYSTEMS

## WELLNESS AT HOME

The rejuvenating energy of water, air and underwater lighting are combined to provide a revitalising massage in your own bathtub at home. A feast for the senses – in total privacy. Whirl systems are available for bathtubs with acrylic or solid surfaces.

The unique air massage system from LAUFEN has up to 90 air jets in the floor of the bathtub and is extremely effective and comfortable. Thanks to the many openings, the whole body is evenly treated with ozonated warm air, which moves via air ducts under the bathtub floor into the water. No metal nozzles protrude from the bottom of the bath. The intensity of the air massage can be continuously adjusted up to 100%. The air massage system is self-drying and therefore extremely hygienic as well as being low maintenance.

# BATHTUBS WITH LIGHTING / WHIRL SYSTEMS

Coloured lighting stimulates all the senses. LAUFEN offers two different types of lighting: Underwater LED lamps light up the water or an LED strip in the slot overflow (found in the Kartell by Laufen bathtubs) creating a relaxing atmosphere. Normally, the colour of the LED lights constantly changes, but you also have the option of selecting one colour using the sensor control system.

# BATHTUBS WITH LIGHTING / WHIRL SYSTEMS

## Electronic sensor control

	Air massage	LED lamps	LED strips in slot overflow
Option 605	x		
Option 615		x	
Option 616			x
Option 625	x	x	

The contact sensors to control the whirl system are seamlessly recessed into the rim of the bathtub so that they do not interfere with the aesthetic appearance of the bathtub. This is not just simple and ingenious, it also improves safety. They are also scratch-resistant, hygienic, and easy to clean. It is easy to control your whirl system by gently touching the illuminated symbols on the rim of the bathtub.

# MARBOND BATHTUBS AND SHOWER TRAYS

LAUFEN SOLUTIONS Rectangular shower tray, square 90

# MARBOND BATHTUBS AND SHOWER TRAYS

Marbond is a robust composite material from LAUFEN, made of two layers with a high-strength bond between them. It is based on a high quality solid surface material with a robust gel coat finish.

Marbond offers following advantages:

- Pleasant, natural feel
- Surface is easy to clean and care for
- The smooth, anti-bacterial surface hardly attracts any dirt
- Available in colours White and Sand (Solutions Marbond shower trays)
- optional cut-to-size (Solutions Marbond shower trays)
- UV and chemical-resistant according to DIN EN 14527
- Thermal shock resistant according to DIN EN 14527
- Anti-slip surface = high slip security (DIN 51097, Class C for Solutions Marbond shower trays)
- In the case of damage - e.g. scratches etc. - a repair set is available
- Noise protection standards SIA 181 and DIN 4109 certified

LAUFEN FAUCETS

# FAUCETS

## LAUFEN stands for Quality & Design

DESIGN AND DEVELOPMENT

The company provides complete solutions for bathrooms right around the world.

TOOL-MAKING SHOP

## Expertise in faucets – since 1854

Very aware of the power and significance of water as an element, LAUFEN is committed to true aesthetic beauty: We give water a shape to enable it to pamper body and soul.

CASTING SHOP

In 2007, ROCA acquired the oldest faucet factory in Switzerland – Similor AG – and since then has been a subsidiary of LAUFEN. This has enabled the company to complete its product range as a complete bathroom provider. For the last 160 years, the employees have drawn their inspiration from the element of water, and their endless stream of innovations turn bathroom faucets into an artwork form.

MACHINING (CHIP-CUTTING) SHOP

## From hot ideas to cool faucets

GRINDING SHOP AND POLISHING SHOP

What takes place during the concept and planning phases, and what often heats heads to steaming point, gains its ultimate expression at temperatures approaching 1000 degrees Celsius. Production is now in progress, launching the history of a new faucet. Beholding beauty at all times, we accompany it from station to station, until it achieves its ultimate form.

SURFACE TREATMENT SHOP

FUNCTION TESTS

And at the place where ultra-modern machines reach the limits of their capabilities, that's where we encounter art once again: in the faucet finishing shop. Because pure craftsmanship is what people want.

FINAL ASSEMBLY AND PACKAGING

# QUADRIGA Design by Andreas Dimitriadis

QUADRIGA Single lever shower mixer with hand shower

## FAUCETS ADDITIONS

The design of the faucets we install determines how we experience water in the bathroom. With QUADRIGA, Andreas Dimitriadis has chosen a convincingly purist shape for his water source design – sculptural in form and constructed from noble materials.

QUADRIGA has already been honoured with the Red Dot Award for Product Design.

# THE NEW CLASSIC Faucets

Design by  
Marcel Wanders

THE NEW CLASSIC single lever basin mixer; small washbasin 50, undersurface ground; ceramic soap dish and mirror with LED ambient light

## NEW FAUCETS

Maximum functionality and a playful approach with distinctive lines. The proportions of these faucets are perfectly integrated in line for an unobtrusive yet exciting manner. A well-balanced whole comes into being which creates the feeling of tranquility you expect from a modern bathroom. Wanders' all-embracing artistic concept of The New Classic sets its sights on consummate aesthetics in the bathroom – and this presupposes the artistic interaction of the interior.

## NEW FAUCETS

Modern, abstract, geometric – SENSE faucets send a clear signal. However, you cannot help but notice the sweeping proportions which account for the charm of the water dispensers. They look fresh and extremely contemporary with their borrowing of industrial elements. This is how fine art is defined in design.

# PRODUCT FEATURES AND BENEFITS

# SANITARY WARE

## Sanitary ware production: Tradition and innovation

The basic ingredients for making ceramics have always been naturally occurring raw materials: Kaolinite, clay, feldspar and quartz sand form the basis for this extremely durable and hard material. The individual components of this malleable material are combined, homogenised and cleaned as part of a unique and very protracted process at LAUFEN. The resulting slurry – the pourable starting material for ceramics – is poured into pre-prepared plaster moulds or shaped using a special pouring process developed at LAUFEN.

The formability and pourability of the material allows the creation of a wide variety of sanitary ware products, but nevertheless always poses a manufacturing challenge, especially when creating objects with complex geometries.

Dried and glazed blanks are then baked in a kiln at temperatures up to 1240°C. Such extreme kiln temperatures ensure the hardness and durability of our high-quality LAUFEN products. Ceramics, through their smooth, easy-to-clean surface, fulfil the highest hygiene standards – chemical acids, strong cleaning fluids or hydrochloric compounds hardly affect the material. Due to its light fastness, versatility and pleasant appearance, ceramic is the most popular material

used to manufacture high-quality sanitary fittings.

## Top recycling qualities

Ceramic is the oldest malleable material used by mankind – and consists exclusively of naturally occurring raw materials. Ceramic is 100% recyclable and can be reintroduced into production processes as a ground powder or reused as a valuable raw material in other industries.

## Ceramics or synthetic materials

Ceramic is the material which has been traditionally used in the bathroom over the centuries – and with good reason. The superiority of the material is evident, particularly in terms of hygiene, useful lifetime, environmental compatibility and durability. However, washbasins made of plastics and mineral-based cast materials are also available on the market, which present a design challenge to producers of sanitary ware. LAUFEN has always had a reputation as an innovator in the sanitary sector and is always striving

to improve the materials and production techniques it uses. As a result of these efforts, new ceramic compositions have been developed that allow smaller tolerances and even more precise corner radii or large flat ceramic items. Made to measure washbasin solutions ensure that ceramic sanitary ware can be fitted with millimetre precision into bathroom floor plans. Ceramics therefore deliver outstanding performance in all respects

 SaphirKeramik

## A revolution in the formal language of ceramics

The innovative and high-quality composition of SaphirKeramik bestows possibilities and versatility never seen before upon the base material, enabling exceptional shaping. Edge radii of 1–2 mm are thus technically feasible. The new type of ceramic is considerably harder and has an improved bending strength. LAUFEN is thus able to produce thinner ceramic bodies, which reduces weight and the consumption of raw materials and energy. SaphirKeramik is not a replacement for any of the existing materials; instead, it broadens the range of forms of expression of the natural base material.

# LCC Laufen Clean Coat

This innovative ceramic surface finish is a vitreous silicate ceramic coating on top of the original glaze. LCC is an extremely hard, indeed almost indestructible indivisible part of the ceramic object to which it is applied.

The benefits of this process: With a roughness of only 4 nanometers, LCC is entirely free of pores. Thanks to this feature, lime, dirt and bacteria have practically nowhere to gain a foothold – and even if they do, they can be removed much more easily. A hydrophilic effect caused by the material ensures that dirt particles are more easily washed away on flushing. In addition, cleaning and disinfection fluids spread over the surface more easily and thus work more effectively.

This is an ideal solution for the rigorous demands of everyday cleaning – for example in hotels or clinics – as LCC also means the sanitary ware is highly resistant to aggressive cleaning agents and chemicals. LCC ensures the highest standard of cleanliness and hygiene in the long-term. Even after years of use, the sanitary ware remains smooth and shiny, just as it was when it was brand new, in private bathrooms and public and semi-public areas.

Laufen Clean Coat LCC was awarded the iF material design award and nominated for the German Design Award.

# LAUFEN EasyFit

LAUFEN has developed a revolutionary wall fixation system for WCs, bidets and urinals. A patent has been lodged. The invisible, easy to mount fixation system meets the needs of both fitters and end users.

For example, end users are impressed by a ceramic WC with a flawless surface which is really easy to clean since there's nowhere for dirt to hide. Fitters are enthusiastic about the time-saving, intuitive mounting system

# Comfortable lowering system

Thanks to our convenient lowering system many of our WC covers and seats close gently and quietly. For easier cleaning, all LAUFEN seats can be removed with a simple hand movement. LAUFEN seats have been comprehensively tested: amongst others the test includes opening and closing 50,000 times.

# Vario Outlet

MAXIMUM WALL CLEARANCE FOR  
VERTICAL FLOOR OUTLET

MINIMUM WALL CLEARANCE FOR  
WALL FLOOR OUTLET

HORIZONTAL WALL OUTLET

The installation dimensions of WCs are not always identical: In many renovation situations the LAUFEN Vario outlet can make it easier to connect the WC to the sewage network. Both horizontal and vertical outlet wall clearances of up to 305 mm for washdown are possible.

## Without flushing rim

Most of the bowls of the new LAUFEN WCs are rimless. There's no longer anywhere for dirt and deposits to hide; instead, thanks to an innovative and powerful flushing system, everything's flushed cleanly away with both the 6/3-litre version and the 4.5/3 litre version. Both public toilets and private bathrooms can benefit from the easy cleaning and great hygiene of this system.

## Water saving WCs

The latest generation of LAUFEN water-saving WCs are optimised to a full flushing volume of 4.5 litres of water. Compared to today's 6/3 litre Dual-Flush these models provide substantial water savings. With an average of 5,000 flushes per WC per year, the yearly water saving is at least 6,000 litres, or more than 27,000 litres if we take into consideration that 9 or even 12 litre models are still in use. LAUFEN WCs marked with the green 4.5/3L logo are not only fulfilling the requirements defined in the harmonized standard EN 997 Class 1 Type 5 and Class 2 (that cover the whole European territory), but also fulfill the challenging Australian requirements of SAI/Wels 4 Stars.

For Laufen the European water label is the most reliable and transparent way for consumers and professionals to clearly appreciate the potential regarding the reduction of water consumption. LAUFEN toilets, cisterns and urinals are developed to reach the highest level of water saving performance. Please note that a suitable downstream drainage system must be built for this kind of water-saving WCs. In case of restrictions of the existing drainage system or local regulations LAUFEN WCs

marked with green 4.5/3L logo can also be flushed with standard 6 litre flushing volume.

## Flushing mechanisms

The flushing mechanism is the heart of every cistern from LAUFEN. In order to exceed current standards, the engineers of the Swiss bathroom specialist set themselves the highest quality goals during their extensive development programme.

This is also confirmed by the certifications e.g. by LGA and Q Plus. During development it was ensured that the flushing mechanisms were prepared for future development and were completely backwards compatible. Replacing "old for new" is thus no problem for sanitary technicians. The water supply options also offer flexibility, as they can be attached at the side, at the rear or from below.

The love of detail is proven by the elegant, independent design of the chrome-plated flush mechanism. The flushing mechanisms are produced completely within the European Union. Spare parts management and service are fully undertaken by LAUFEN.

## Intelligent Control System

The intelligent control system has different modes and can trigger cleaning after each user or at defined intervals with different flush quantities of between 0.5 and 3 litres. Following long periods of non-use, a hygiene flush takes place every 24 hours by default. There is also an integrated overflow protection function in case the drain hole becomes blocked.

### Hybrid mode

The urinal flushes at a predefined interval if usage is detected, and not after every single use. The flushing interval can be set to six different values between 1 h and 12 h. A predefined flushing volume is assigned to each flushing interval.

## 0-LITRE URINAL

The LAUFEN Lema 0-litre urinal saves water and money. It operates without water and does not require a water shut-off device or electricity to keep the drain closed. The urine itself helps to keep gases sealed in and to prevent their escape. The principle behind this "trap" is known in the chemical industry as the Erlenmeyer flask.

**LEMA 0-LITER-URINAL SAVES WATER AND COSTS**

## Made-to-measure sanitary ware

Many large LAUFEN washbasins can be manufactured made-to-measure at the factory. Using this innovative production technology, we can manufacture sanitary ware to fit the plan of your bathroom. The ceramic piece can be cut to size – even on the diagonal.

## Sound insulation sets

The bathroom is private. So that it stays that way, LAUFEN provides sound insulation sets, consisting of specialised foam and rubber elements for its washbasins and wall-mounted WCs. These elements considerably reduce the amount of noise due to usage and functions that passes through the wall into neighbouring rooms. Depending on the structural situation, a sound reduction of up to 9 decibels can be achieved, which means that noise is reduced by almost half. These sets have been tested against DIN 4109 and certified by Fraunhofer.

- 89269.1 sound insulation set for washbasins up to 80 cm
- 89269.2 sound insulation set for washbasins of 80–100 cm
- 89269.3 sound insulation set for washbasins of 110–180 cm
- 89269.4 sound insulation set for EasyFit fixation system

# WELLNESS

## Bathtub and shower tray materials

When choosing the bathtub or shower tray, material choice depends on individual preference and intended use. In order to be able to provide the right solution for all situations, LAUFEN provides four different materials:

### Sentec

Bathing in a bathtub made of solid surface material Sentec feels like being in a natural basin. Due to a high percentage of mineral particles, the surface feels smooth. The innovative material also allows an incredible freedom of design: almost every shape is feasible – from very organic to very straight and architectural. Furthermore the non-porous surface of the material is hygienic, durable, UV-resistant, highly resistant to scratches and can be effortlessly cleaned.

### Steel

Bathtubs and shower trays in enamelled steel are hygienic, and resistant to acid, scratching, impacts and abrasion. LAUFEN steel bathtubs are produced using heavy 3 and 3.5 mm enamelled steel; they are extremely dimensionally stable and come with an anti-slip coating. In addition, they are fitted with a sound insulation system.

### Acrylic

Bathtubs and shower trays made of sanitary acrylic have benefits due to the insulating properties of the material and its warm surface. Together with an underlay made of hard foam, the material helps your bath water retain its temperature for a long time. LAUFEN sanitary acrylic is integrally coloured, is light and colour fast and easy to clean.

### Marbond

Marbond is a composite material made of two layers which are extremely well connected with each other: The basis is formed by a high-quality mineral casting material, the surface is coated with a two millimetre thick acrylic layer. Marbond is hygienic, easy to clean, temperature resistant according to EN 263 and anti-slip (class C).

## Whirlpool

Wellness at home: LAUFEN combines the rejuvenating energy of water, air and underwater lighting for reviving massages in your own bathtub at home. A feast for the senses – in total privacy.

When ordering whirl systems, LAUFEN always recommends to order bathtubs with acrylic panels or to install removable tiled drywalls for easier access in case of maintenance. If you can't avoid bricking in the bathtub, please plan large inspection chambers of minimum size 50x50 cm so that technical parts remain accessible. The installation of an additional ventilation grill is compulsory.

### Air nozzles

Up to 90 nozzles positioned in the bathtub floor effectively revive your body all over. The outlets are installed flush with the bathtub floor and therefore do not impede enjoyment of the whirlpool. The warm and tingling ozonised air is blown into the water via air conduits under the base of the tub. The system is self-drying and therefore hygienic and easy to maintain.

## Lighting

Coloured lighting appeals to all senses. A LED strip in the overflow slot (used in Kartell by LAUFEN bathtubs) creates a relaxing atmosphere. Usually the colours of the LED lights change continuously, but one colour can also be selected via the sensor control system or remote control.

## Sensors

The wellness functions of the LAUFEN whirlpool can also be controlled by touch-sensitive areas on the bathtub rim: The system is safe, scratch-resistant, hygienic and easy to clean – and does not detract from the aesthetic of the bathtub.

## Styrofoam carrier

A bathroom which is installed properly and perfectly arranged helps to achieve a balanced and harmonic atmosphere. That's why LAUFEN offers a suitable styrofoam carrier for each drop-in bathtub (except the ones with whirl system). These carriers simplify the mounting of the bathtub enormously: mounting is quicker and cleaner, because there is no bricking necessary, and tiling is also much easier on the perfectly accurate surface of these unseen helpers.

## Installation kit

The LAUFEN installation kit made of hard foam allows a wide range of shower trays to be installed flush with the floor – and also assists with sound and heat insulation. A protective peripheral strip securely permanently prevents water from entering between the tiles and tray.

LAUFEN bathtubs and shower trays conform to applicable European standards and are tested and monitored on-site by the independent testing institute LGA Quali Test GmbH.

## Sound insulation sets

LAUFEN sound insulation sets for bathtubs and shower trays significantly reduce the transmission of sound to neighbouring rooms and ensure a private, undisturbed bathing experience – without disturbing the neighbours. Irrespective of the structural conditions, a sound reduction of 10 or even 16 decibels can be achieved. Even a 10-decibel reduction corresponds to a 50% reduction in audible noise. LAUFEN sound insulation sets are tested against DIN 4109 and are certified by Fraunhofer.

## Antislip

Antislip is a surface treatment which is applied to glazed and enamelled surfaces and then fired on and is thus optimally integrated into the surface structure. The surface offers a secure grip and is also easy to clean, and resistant to acids and scratching. Antislip has been tested against the German industrial standard DIN 51097 and offers higher than average antislip performance. With or without antislip, LAUFEN shower trays feel comfortable on the skin.

# FURNITURE

## Furniture surfaces

Furniture surfaces in the bathroom are designed to deal with the room's special climate conditions. LAUFEN provides a range of different surfaces, all optimised for their intended use and come with a guaranteed long useful life.

### Real wood veneer

A cosy bathroom in wood. The classy wood veneers provide the haptics and optics of real wood. They are resistant to moisture and equipped with reinforced edges, making them resistant to impacts. These real wood veneers include those used in Lb3 and ILBAGNOLESSI One 'noce canaletto'.

### HPL

HPL (High Pressure Laminate) surfaces are suitable for heavy use and are exceptionally durable, even with the look and feel of wood. They are easy to care for and clean, they are light-resistant and odourless and not sensitive to alcohol, organic solvents and water. HPL coatings are used by LAUFEN for the Space series.

### Painted furniture surfaces

Our classic high-gloss paint finish, using two-component water-resistant paints, offers perfect surfaces with no unevenness and a wide range of colours. LAUFEN painted surfaces include the ILBAGNOLESSI One white furniture and LAUFEN also offers 39 additional special paints (shown on right) for the Case, Base, Space and Laufen Pro furniture ranges.

### Film coatings

Film coatings are pulled over corners, thus ensuring the furniture surfaces are joint-free and not sensitive to water. They are scratch, water and light-resistant. Their flexibility offers a great deal of design freedom in terms of the forms used, such as integrated handles, for example. LAUFEN uses film coatings in its Palomba Collection, Living Square, Laufen Pro and Case ranges.

## Storage systems

Tidy storage systems in drawers of the ILBAGNOLESSI One, Boutique and Space for VAL bathroom furniture range ensure tidy storage and prevent the return of chaos every time a drawer is closed fast.

## Soft close

Slamming of doors is not inevitable: At LAUFEN, soft close means gently-closing furniture doors and drawers. The system is integrated as standard into all LAUFEN furniture. In this case, quality can be felt and not heard.

# LIGHTS AND MIRRORS

## 3D mounting system

Comfort in every detail: The flexible and adjustable 3D mounting system makes installation LAUFEN furniture on the wall quick and easy.

## Space saving siphon

LAUFEN undercounter furniture can optionally be equipped with an innovative space-saving siphon (1). This dispenses with the need for siphon cut-outs in the drawers (2), reclaims valuable storage space and ensures unlimited use of internal space.

## Light in the bathroom

For bathing in light: with illuminated mirrors and mirror cabinets, LAUFEN offers a wide range of individual light solutions. From integrated LED lighting (1) to fitted, dimable LED lights (2) which offers useful light directly in front of the mirror for applying make up or shaving, to glass-edge lighting (3) attached on the cabinet shelving.

## Sensor switch

As an option for Frame 25 mirrors, LAUFEN offers an integrated contact-free sensor switch for mirror lighting. This means you can switch the light on by putting your hand near the mirror, without having to touch the mirror at all.

# FAUCETS

## Eco & Eco+

Do your bit to save water and energy: even small changes make a big difference. Laufen has long been committed to preserving resources. For instance, through revolutionary technical solutions like the Ecototal control cartridge with integrated volume and hot water restraints, or the Eco and Eco+ water and energy-saving functions. These Eco functions make it easy for you to use less water and energy, and therefore do your bit for the environment. Faucets with the Eco+ function, for example, run cold water by default when the lever is in the central home position.

Faucets with the Eco function offer standard mixer functionality, but with temperature and volume restraints to help draw attention to excess consumption.

### Eco

- Smart, no-nonsense resource-saving solution for private households
- 30 % reduction in water and energy consumption thanks to a water-saving flow regulator as well as volume (Flow-Control) and temperature restraints
- Long service life and low maintenance

### Additional benefit of Eco+

- No unintentional use of hot water as the faucet runs only cold water when the lever is in the central home position ('cold water start')

### FlowControl

- A noticeable resistance is exerted by the volume restraint
- Once the volume restraint is overridden, the full volume of water is supplied

## Thermostatic

Who isn't familiar with the situation? Fiddling with taps to get the temperature right before stepping into the bathtub or shower. Our user-friendly, highprecision thermostat mixers provide the answer.

### Practical – smart technology at a second glance

The new generation of thermostatic mixers combine temperature and flow regulation at one side. The inner workings are also remarkable. The thermostatic mixers have a built-in safety function: if the supply of cold water should fail, the hot water is stopped automatically. And, thanks to the insulated hot water line, the faucet body never gets hot.

### Space-saving – flush-mounted thermostats twinplus & cityplus

Outstanding thermostat technology in the most compact design. Flushmounted thermostat mixers offer the same convenience as surface-mounted versions. In addition, with the flush-mounted solution Simibox you can simply build the tech-

nology into the wall. This saves space, and depending on the bathroom design, achieves an elegant stylish solution.

### Spot on – precision selection of water temperature

Simply set the degree and enjoy your shower at the temperature of your choice. Additional safety feature: the child-friendly stop button limits the temperature to 38 °C. You have to press and turn the button at the same time (see illustration 4) for hotter water.

### Economical – infinitely adjustable water flow

Regulate the water flow at the turn of a hand. Use the Eco button to easily save more water (see illustration 5). By pressing the stop button you leave the ECO range and the water runs at full flow (see illustration 6).

# Showerstations

The new generation of showerstations offers a host of advantages that provide a unique showering experience: From simple designs to different settings and functions.

## Slim, simple rain shower head

ø 300 mm or 300 x 300 mm, 2 mm thick, in chromed stainless steel, immediate non-drip water stop. shower head arm can be locked and swivelled horizontally by ±60°.

## Adjustable wall mount

The water-carrying shower rail fastener can be adjusted during mounting:  
 – height and lateral compensation ±5 mm  
 – depth compensation -7 mm / +10 mm

## Smooth MyTwin & MyCity handshsprays included

Luxury handshsprays with three spray modes and SmartSelect switchover function.

## Easy handspray height adjustment

Push-action holder: simply press the button at the side, adjust height, let go and the spray is securely fixed.

## One-handed thermostat control

Temperature and flow regulation at one side. Particularly helpful: thanks to smart water circulation, the faucet body does not get hot.

## Discreet diverter

Positioned below the faucet, the simple and unobtrusive diverter switches from hand to rain spray.

# Handshowers MyTwin & MyCity – Design with meticulous attention to detail

## Convenience with a high pleasure factor

LAUFEN hand sprays not only look smart, they are smart. The 120 mm sprays feature the "Rain-Spray" option, the "MassageSpray" and a combination of both spray types, the "MixedSpray". A press of the SmartSelect button switches conveniently between a gentle rain shower and vigorous massage spray.

The integrated air mix enhances the soft pleasant showering experience. Thanks to RubiClean limescale residues rub off quickly and easily to ensure many years of unadulterated showering pleasure.

## Technically savvy

However LAUFEN's modern hand spray technology offers even more. All sprays are supplied with the "Ecochoice" limiter. It limits the water rate to 5.7 l/min and therefore bears the 'A' energy label. Anyone preferring a higher water flow of 11.3 l/min, can remove the controller manually. Special attention was paid to the choice of materials used. All water-conveying parts are made of quality materials that comply with drinking water ordinance requirements. Thanks to the smart technology inside the hand sprays do not heat up, and thus offer perfect protection against scalding.
